

GRUNDIG Adjusting transmitter AS5F

Calibration transmitter with digital frequency display

Frequency range 100kHz ... 120MHz in 10 steps

Quartz-stabilized 4½ digit frequency meter for generator and / or brand frequency

Frequency meter external to 200MHz usable

Five sweep areas (AS5 has three)

Compared to AS5 additional wobble function for picture and sound IF in TV sets. Can be FM-modulated in the FM IF range

Quartz precision mark, variable over the whole sweep range

Internally / externally modulable

Wobble frequency adjustable from 5Hz to 50Hz as sawtooth or triangle

1kHz, 4kHz, 19kHz pilot tone selectable by internal LF oscillator
